## Add-on Lenses

## Introduction

There are many companies making add-on lenses for iPhones. However, like anything else, you must spend some money to get quality lenses - this document only discusses some of the better lenses. Some lenses include a clip while others include a special case just for the lenses. Others include both to give you the most options. Some even provide a case, mount, lens pouch and lens cap. Sandmarc is one of these companies.

## Lenses

- Sandmarc this company provides all the accessories you need and can be found <a href="https://example.com/here">here</a>. They claim that if you get a new phone, you just need a new case to use your existing Sandmarc lenses. Unfortunately, they can't be purchased at Amazon or BestBuy. You can read a review <a href="here">here</a> and more info <a href="here">here</a>'s a typical kit for the iPhone X <a href="here">here</a>. You get \$240 worth of lenses for \$190.
- 2. **Olloclip** these lenses are available at <u>Amazon</u> or at <u>Olloclip.com</u> and can be used on an iPhone without a case or by using a special case available on Amazon <u>here</u> for \$29. Make sure you purchase the lenses and case for your specific phone.
- 3. **Moment** their lenses are available <a href="here">here</a>. These are more expensive than most and their web site can be difficult to understand.
- Ainope here's an interesting concept. I can't vouch for the lens quality, but you don't have to switch lenses.

You can read more reviews <u>here</u> or just search the Internet for more information. Also, <u>here's</u> a link to more reviews.
