

Backing up

- iCloud
 - With iCloud Photo Library enabled, your photos are automatically backed up to Apple iCloud server
- Google Photos
 - If you installed the Google Photos App, your photos automatically backup to Google Photos online
- You can also transfer your photos from a mobile device to a PC. See the information [here](#).
- Back up the photos on your PC.
 - You should backup your photos to an external hard drive or use OneDrive. See the information [here](#).
 - A great device for transferring or backing up photos is the SanDisk iXpand USB to Lightning Flash Drive as seen [here](#) and pictured below..
