Photography Resources

Introduction

There are many resources available on this topic, but the ones listed below are free. I will continue to update this document as other resources are discovered.

Resources

- Lynda.com (now owned by LinkedIn). This resource requires a library card form the Mission Viejo Library. This alone justifies having a card. Here are the instructions below. The instructional videos can be watched on your mobile device or PC.
 - Get a library card from the Mission Viejo Library
  - Go to cityofmissionviejo.org
  - Click Library Services

  - Click Online Resources

  - Scroll down to Careers and Education

  - Click Lynda.com
  - Log in with your library card number and the last 4 digits of the phone number attached to your card.
  - You can search at the top by topic. For example, search for iPad, iPhone Photography or any other topic. Some tutorials have exercise files which are usually zip files.

Note – you can install the Windows Desktop app and download videos for offline viewing later. Warning – it's a slow process.

Misc. Sites

- iDB site [here](#).
- iMore site [here](#).
- Macworld site [here](#).
- Apple site [here](#).
- Digital Photography School site [here](#).
