

Sharing photos and videos

Printing Photos

- From your PC, the best way is to open a photo in the Photos application. Once you click the printer icon as shown below, you have many options.

- From your mobile device open the Photos app and tap the share icon. Select Print, select your printer and print. There are not many options printing this way but if you have an app from your printer manufacturer you will have more options. Below are the options for the Canon app.

Sharing your photos

- Via Email. See how to set up Windows Mail App [here](#).
- Using Instagram
- Using Air Drop
- iOS Photos App sharing
 - Read how to set up Family Sharing [here](#)
 - Read how to use Photo Sharing [here](#)
- Aspect Ratios for Printing photos (see info [here](#) and [here](#))

Scan old photos with free app seen [here](#)

This is an amazing app for your mobile device
