

Taking photos and videos

Using your iPhone and iPad camera

- Using your camera- see info [here](#)
- Taking photos - see the info [here](#)
- Shooting HDR – see the info [here](#)
- Taking and editing Live Photos – see the info [here](#)
- Long exposure - see the info [here](#)
- Taking videos see the info [here](#)

When you take a photo, where does it go?

- This is not the same for everyone, it depends on which apps you have and on your settings. This will be explained in class.
- Here's what happens when I take a photo or video with my iPhone
 - It appears on my iPad
 - It appears in Google Photos app
 - It appears in Google Photos online
 - It appears on Google Drive depending on my settings
 - It appears in iCloud.com
 - It appears on my Flickr account online
 - If I had the Dropbox App on my iPhone it would appear there and on my desktop if I install Dropbox
