

# How to instantly share photos using Family Sharing for iPhone and iPad

[Family Sharing](#) not only lets you share iTunes and App Store purchases with other members of your household, but also gives you a way to share photos instantly. By using [iCloud Photo Sharing](#), Family Sharing lets you share photos to a single stream that everyone in your family has access to. Once you've set up Family Sharing and everyone has joined, all you've got to do is start sharing photos!

## How to share photos with Family Sharing and the Photos app

1. Launch the **Photos app** on your iPhone or iPad.
2. Tap on the **Shared tab** in the bottom navigation.
3. Tap on the **Sharing button** in the upper left hand corner to get to the main iCloud Photo Sharing list of streams.
4. Tap on the **Family** stream.
5. Tap on the **plus sign**.
6. Select the photos you want to add and then tap **Done** in the upper right hand corner.
7. Type a description if you'd like and then tap **Post** in the popup window.
