

Using Syncios

What is Syncios

Syncios is a program that allows you to copy media (photos, videos & songs) in either direction between your iOS device and you PC. It also allows you to delete media.

Note - Please note that iTunes must be installed on your computer for running Syncios Manager but you do not have to run iTunes while you use Syncios Manager.

Here's an example solution to a common problem:

Assume that your iPhone or iPad is running out of space. One thing that you could do with this program is to copy all of your photos to your PC, and then delete some or all of them from your device, thus freeing up some space.

The program is available at <http://www.syncios.com/features.html> and has both a free and paid version. Here is a summary of both versions. Note that the paid version has a one-time cost of \$19.95. You do not need to pay for this for most features to work.

Syncios iOS Manager Light-weight and Powerful iTunes Alternative	SALE Syncios Pro Only \$19.95	Free

- Delete photos, songs and videos from your device

Here's a synopsis of the paid version

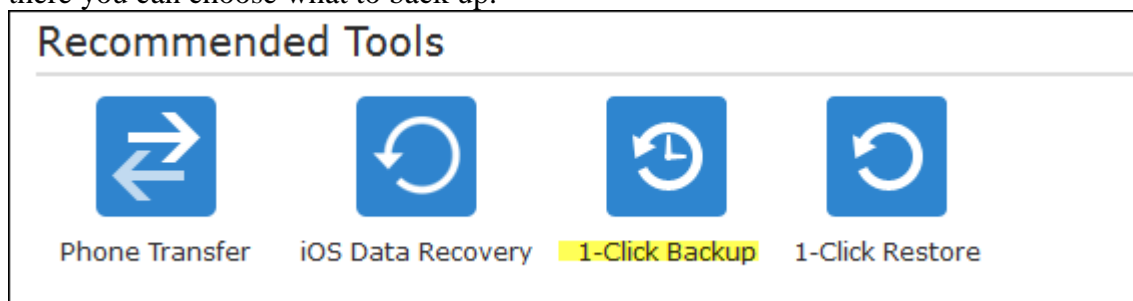

- You can download videos from YouTube and transfer them to your device
- One-click backup of your device

Using Syncios

1. Download and install Syncios on your computer.
2. Please be sure that iTunes has already been installed on your computer for running Syncios Manager. But note that you do not have to run iTunes when you use Syncios Manager.
3. Connect your device to your computer with a USB cable and launch Syncios Manager.
4. Go to the left panel of Syncios and click **Media**, **Photos**, **EBook** or **Apps** tab. After you click each icon, you can see your data in different categories from the right panel. Choose any one of the categories, you can see **Import**, **Export**, **Delete**, **New** in the middle of the panel. Click "**Export**" button to backup your iPad data to PC.
5. Should you get lost, just click My Devices at the top
6. For example, to work with Photos, select Photos on the left as shown below

7. Next, to transfer photos to your PC select some photos and click Export. Browse to a location on your PC where you want them to go
8. Note, you can also choose to Import or Delete photos.
9. To work with music, click Media on the left
10. Note – if you have the Pro version you can select the Toolkit and click 1-Click Backup. From there you can choose what to back up.

For instructions on how to download a video from YouTube and transfer it to your device see the information [here](#). Note – this requires the Pro version.
